

PACKAGE OPTIONS:

The company offers changes to the sensor packages. Some of the standard changes are shown in Section 6 of this Data Book. These include, but are not limited to:

1. Barbed pressure ports.
2. Lead bend options.
3. PC Board options for compatibility to sensors of other manufacturers.
4. Protection for the packages for customer specific applications and working environments.
5. Protection for the electronics for customer specific applications.

In general there is a modest increase in the per unit price for the package option. There will be a minimum quantity per order depending upon the option.
